Forged Type 316SS with Clevis and Cotter Pin. These parts will fit turnbuckle bodies with UNF threads.

Threads are UNF. Specify right or left hand thread. Common on Profurl installation to take Profurl pin through eye with a double jaw toggle to attach to stemhead chainplate. Lower end of turnbuckle body attaches to left hand thread of the eye and the upper end of turnbuckle body fits a right hand swage or Sta-Lok stud. Also used to attach turnbuckles to fixed jaws as in bow sprits, bobstay hardware and some types of chainplates.

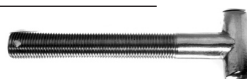

Stemball Eye with Cup

Pin Hole	Cup Diameter	For Wire Size	Part Number	Price
3/8	1	3/16	NAVN639-3212	22.07
7/16	1	7/32	NAVN639-3214	27.09
1/2	1	1/4-9/32	NAVN639-3216	29.67
1/2	1.340	5/16	NAVN639-4416	48.61
5/8	1.340	5/16-3/8	NAVN639-4420	59.11

Used at the mast head on backstay and headstay on some masts when adding furling systems and insulators to the rig. Commonly used with a Double Jaw Toggle with an Eye Terminal or with a Toggle Fork to terminate the upper end of stays. Stemball receiver must have slot to pass eye end.

T-Bolt Only
