The diameter of rigging wire is made either to nominal fractional inch or metric dimensions (mm). In some sizes the wedges are interchangeable. Sta-Lok terminals must use a specific fractional or metric size wedge, however some sizes of wedges are identical.

The fractional / metric wedge table below can help you with this distinction

mm.	Inch	
3	1/8	Wedges are identical
4	5/32	Wedges are identical
5	3/16	Wedges are different
6	1/4	Wedges are different
7	9/32	Wedges are identical
8	5/16	Wedges are identical
10	3/8	Wedges are different
11	7/16	Wedges are identical
12	1/2	Wedges are different
Larger than 1/2" or 12mm - Wedges are identical.
